Technical delivery leader and coach, interested in providing value by leading software delivery teams with hands-on involvement

Experience

Delivery Lead / Technical Project Manager, ThoughtWorks; NY – 2019 present

Delivery Lead / Technical Project Manager, Buildit; NY – 2017-2019

Delivery Lead / Technical Project Manager, ThoughtWorks; NY – 2012-2017

As a Principal/Delivery Lead, I lead agile transformation efforts for our clients, helping upper management instill change in their organizations, working with middle management to evolve their ways of working to an agile approach, including:

- Running workshops (discovery, agile maturity modeling, value stream mapping, modern product management methodologies, lean-UX)
- Diverting effort to a value-based system, away from "story points" to value-based metrics
- Leading agile transformation in product management, including establishment of CI/CD pipelines, XP practices, pairing, cross-functional teams, infrastructure as code, early testing
- Leading product planning teams by creating backlogs, feature and story development
- Coaching and running agile delivery mechanics such as TDD/BDD, Story-writing, sizing, stand-ups and retrospectives
- Lead product team by removing barriers, instilling a sense of urgency, allowing team creativity yet with a vigilant pragmatic approach
- Interviewing and hiring team members, acting as a coach and mentor
- Helping as a tech lead when discussing architecture and interfaces between systems

VP Software Engineering and Development 2002– 2012

- Led the software development department that develops wholesale and retail carrier applications and products (internal and external).
- Managed a \$7M budget and a 50 person software development department in addition to outsourcing management.
- Agile software development methodology transformation, emphasizing close contact with our customers, user story creation, TDD/BDD, automated continuous testing and short deliverable cycles.

Please see the complete list of my previous experience spanning more than 30 years at
